-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

In view of the pre-brief conference request filed on 02/13/06, PROSECUTION IS HEREBY REOPENED. Claims 1-23 are rejected under the new ground of rejection as sets forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2179

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Matthews, III et al. [US. 5,724,492].

As to claims 1, 14 and 23, Matthews teaches a computer implemented method and corresponding apparatus for providing an aesthetically pleasing transition between two or more menu bars comprising the steps/means for determining to change from a first menu bar currently displayed (figures 11-12, column 18, line 57 through column 19, line 2); updating a computer display to display a second menu bar in place of the first menu bar (figures 11-12).

rendering animation graphics to animate the transition between the first and second menu bars such that the difference between the first menu bar and the second menu bare are apparent (column 15, lines 5-15, lines 39-42 and 53-62).

As to claims 2 and 15, Matthews teaches detecting a triggering event; wherein the step of determining is performed in response to the detected triggering event (column 10, lines 4-17).

As to claims 3 and 16, Matthews shows the triggering event comprising a user initiated event (column 3, lines 60-62 and column 4, lines 32-36).

As to claim 4, it would have bee inherent that a user uses a mouse click for the triggering event.

As to claim 5 and 8, Matthews shows the triggering event performing the step of changing which application is currently active in the computer operating system (figures 11-12, column 18, line 57 through column 19, line 2).

As to claims 6-7 and 17, Matthews also shows the step of changing comprising opening and quitting an application (column 16, lines 1-52).

As to claims 9 and 18, Matthews shows the animation graphics comprising rotation animation graphics (column 16, lines 3-14).

As to claims 10 and 19, Matthews shows the animation graphics comprising scrolling animation graphics (figures 17-18, column 16, lines 9-13).

As to claims 11-13 and 20-22, it would have been inherent that Matthews shows animation graphics comprising three-dimensional animation graphics, the three-dimensional animation graphics comprising animation graphics utilizing gray scales and the three-dimensional animation graphics utilize gray scale to virtual lighting effect because Matthews teaches the animated transition between two panel menus in a three dimensional structure.

### **Response to Arguments**

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground of rejection.
